

## **Secret Bendos : Good for young children.**

Number of Players: 2 to 4

Players aged: 5 +

### Preparation

Shuffle the Bendominos and deal them equally between players. In the case of three players there will be one piece left over.

### Play The Game

Players do not look at their tiles but arrange them in a vertical row in front of them face down.

If there is a leftover tile, turn it over to begin the game. If not, the youngest player lays the top tile from his or her row.

The second player then turns over the top tile in his row and plays it if possible. Bendominos have to match either of the Bendomino chain but also has to fit !

If the tile cannot be played it is turned face down and moved to the bottom of the row. If it is a double then it is returned to the bottom of the row but it remains face up so all the players can see it.

At every stage a player may only play the domino at the top of their row.

The next players then has his/her turn, playing in the same way.

### Winning :

Play continues until a player gets rid of all their Bendominos and calls "Bendomino!" or the game is blocked.

The first player to get rid of all his or her bendominos wins the game.

If the game is blocked (no player can put a new tile), the player with the lowest amount of tiles left, wins.
